

Technical Product Bulletin

Number: DJTPB001

Name:	Positive Terminal
Application:	Dental Equipment Component
Description:	Positive terminal used in a light weight hand held dental vibrating scaler and a hand held heated irrigator.
Dimensions:	1 inch overall length x .250 inch diameter.
Material:	360 Brass.
Tolerances:	± .005" typical with many dimensions held to ± .002"
Finishes:	Bright Electroless Nickel Plating.
Fabrication:	Single spindle Swiss type screw machine.
Special Features:	Consistency in plating and cosmetics is critical for appearance with mating parts. This part must be free of chips and burrs to meet health and safety standards. Special tooling facilitated the machining of a unique undercut within the interior of the part (see photo cut-away detail above).
